React Native + Expo: Student Handout (Step-by-Step Guide)

1. Install Expo CLI (Run once per computer)
npm install -g expo-cli

2. Install EAS CLI (Run once per computer)
npm install -g eas-cli

3. Open your project in Visual Studio Code
File → Open Folder

4. Open Terminal in VS Code (Run every time)
Press: Ctrl + `

5. Install project dependencies (Run once per new project)
npm install

6. Start the Expo server (Run every time)
npx expo start

Summary:
• Global installations → Only once per computer
• npm install → Only once per project
• npx expo start → Every time when working
