ME 2201 Kinematics & Dynamics of Machinery

Tutorial 5

Due on: **Sept 16, 2026**

In the Atkinson engine mechanism shown in Fig. 1 , the velocity and acceleration of the slider at D are given as 40 cm/s and 450 cm/s^2. Determine ω_2 , α_2 , ω_3, and α_3. Take 0_2A = 4.5 cm, AB = 12 cm, 0_4B = 6 cm, BC = 2 cm, AC= 13 cm, CD = 14 cm.
